

## Early Journal Content on JSTOR, Free to Anyone in the World

This article is one of nearly 500,000 scholarly works digitized and made freely available to everyone in the world by JSTOR.

Known as the Early Journal Content, this set of works include research articles, news, letters, and other writings published in more than 200 of the oldest leading academic journals. The works date from the mid-seventeenth to the early twentieth centuries.

We encourage people to read and share the Early Journal Content openly and to tell others that this resource exists. People may post this content online or redistribute in any way for non-commercial purposes.

JSTOR is a digital library of academic journals, books, and primary source objects. JSTOR helps people discover, use, and build upon a wide range of content through a powerful research and teaching platform, and preserves this content for future generations. JSTOR is part of ITHAKA, a not-for-profit organization that also includes Ithaka S+R and Portico. For more information about JSTOR, please contact [support@jstor.org](mailto:support@jstor.org).

- I. *A Letter from Mr. David Martineau Surgeon in Norwich, to Sir Hans Sloane, Bart. Coll. Med. Lond. Pr. S. R. V. Pr. Concerning Stones voided per Anum.*

*Norwich, Oct. 5th 1723.*

THESE Stones (*Vid. Fig. 1, 2, 3, 4, 5.*) were voided by a poor Woman, *per Anum*, on the 26, 27, and 28th of *March* last past, who was then pregnant about the 11, or 12th Week, according to Computation. I was call'd in the Night to this poor Woman on the 23d, who in Appearance was in the Extremity of a Convulsion Fit, attended with violent Vomiting, which when over, she complain'd of great Pain in her Back, from her Reins downward to the *Anus*, upon which I blooded her, order'd some *Anti-Emetics*, and left her : She continued with much Pain the whole Day ; on the 24th, in the Night, her Fits return'd again with double Force, her Pains also increasing like unto Labour-Pains, put me upon further Inquiry, but nothing appear'd more than ordinary ; the Extremity of Pain drove me to the Use of Glysters, which was attempted, but none could be thrown up, although repeated by one and another of the most experienced Nurses, upon which I gave her a gentle Draught, which she observed increas'd her Pain with a strong *Tenesmus*, that continued near three Hours before the largest Stone appear'd, which stopp'd at the upper Part A, D, *Fig. 1.* but was quickly remov'd by pressing the lower Protuberance C, upon which, with a plentiful Discharge, she had

Eafe, slept some Hours, waking with a Desire to stool, and voided with it the 2d and 3d; and the next Day, at four Hours Distance, the other two. She recovered perfectly, and was deliver'd of a very fine living Girl, on the 24th of *August* past. Upon Inquiry, it seems, she had been frequently troubled, for fourteen Years past, with Pains in her Side and Stomach without Vomitings; which is all she remembers.

The Largeness of the Stones, their Seat and Substance, is what to me seems worthy Speculation; their being all alike in Colour and Weight, according to their Dimensions, is the Reason I broke but one.

Wt. of the Stones.      Their Dimensions in Circumference.

	oz.	dwt.	gr.		Inch.		
Fig. 1.	2	16	12	A. B. C. D.	8	A. D. the top of the Stone oval.	Inch. 6 $\frac{5}{8}$
